Camber Steady Plus Progressive

Camber Steady Plus Progressive lenses adapt to the demands of modern life. Their technology meets the visual needs of the most active presbyopes, who demand **clear and stable vision**, even when they're engaged in highly dynamic activities.

- Superior visual acuity and unbeatable aesthetics for plus lenses
- Improved quality of vision in the near zone
- Precise and comfortable focus for all working distances in any direction of gaze
- Near elimination of peripheral blur
- Superior visual quality for viewing digital devices
- Higher image stability for reduced swim effect
- Better performance in binocular vision at near and intermediate

Ground breaking technology

Camber

100%

Wearers reported **NEAR ZONE EASIER TO FIND**

94%

Wearers reported **BETTER NEAR VISION QUALITY**

Dual-sided lens with extra-large visual zones for unbeatable optics and aesthetics.

“Unparalleled vision, especially in the near zone”

Pushing the boundaries of free-form technology, the lens's special geometry **enables wider fields of view and sharper vision, especially in the reading zone.**

The variable base curve achieves a better balance between visual quality and lens thickness, particularly for high prescriptions.

This results in lenses with **the highest level of visual comfort and clarity, particularly for reading and other close-up activities.**

The best visual acuity in the near zone.

With a patented base curve, ideal for the increasing power profile of a progressive lens.

WITHOUT CAMBER TECHNOLOGY

WITH CAMBER TECHNOLOGY

Spatial
Vision

99.5%

of gaze directions are
now optimized

Use of accommodation for improved spatial vision and super dynamic vision.

“ Naturally good vision, even when you're on the move ”

Spatial Vision Technology **optimizes the eye's ability to focus on near and far objects, providing unparalleled sharpness perception and extended focus areas.**

This technology ensures that wearers experience clear and sharp vision, even in dynamic environments where objects are constantly changing distances from the eye. It enables **smooth and rapid transitions across visual zones**, especially when looking down to focus on nearby objects.

WITHOUT SPATIAL VISION TECHNOLOGY

WITH SPATIAL VISION TECHNOLOGY

Eye Focus
Profile

Eye Focus profiling for flawless vision.

“ Flawless vision from any angle ”

Eye Focus Profile Technology maximizes the clear viewing area and significantly reduces perceived blur in the peripheral areas of the lens, achieving an **absolute reduction in defocus and increasing the visual performance of the lenses.**

Ray
Tracing

Optimum vision across the entire lens.

“ Say goodbye to head tilting in search of the exact spot – regardless of distance and direction of gaze ”

Thanks to point-by-point optimization over the entire lens surface, Ray Tracing Technology provides **precise vision at every distance and in every direction of gaze.** Wearers enjoy a more natural visual experience.

Binocular
Vision

Overlap in perception for a single visual image.

“ Perfect synchronization between your eyes ”

Wearer experiences a **comfortable and balanced vision**, with optimal performance **for all activities.** This technology enables clear image and vision, regardless of any difference in prescriptions for both lenses.

Visual
Stability

Attain perfect vision stability, always.

“ Exuding confidence while on the move ”

Visual Stability Technology **significantly reduces the swim effect when moving.** This virtually eliminates image distortions and enhances image stability, providing the wearer with a **comfortable and clear vision experience.**

Lifestyle

Four custom-designed options that adapt to the changing vision needs of wearers at every stage of their lives and lifestyles.

Balance Vision

Designed for **active and demanding presbyopes**, whether experienced or new progressive lens wearers.

Near Vision

Option with **wider near zone**, ideal for reading, crafting or other activities that involve focusing on objects close at hand.

Distance Vision

Option with **panoramic distance zone**, ideal for active and outdoor lifestyles. Suitable for experienced or new progressive lens wearers.

Intermediate Vision

Softer design with a wider intermediate zone, ideal for new presbyopes or wearers who have experienced difficulties with other progressive lenses.

Fitting Configuration

Fitted perfectly to you

→ Individual Fit

Optimizes the vision zones based on the unique data of the wearer, including their prescription, facial morphology, frame shape, and use position.

→ Frame Fit

Optimizes lens performance in any frame by compensating for the unique parameters of the frame.

→ Lens Fit

Optimizes the aesthetic appearance of the lens by utilizing the optimal base curves and thinning prism, resulting in the thinnest possible lenses, even with a high prescription.
