

Bi-AS GO

See better; look better

Meet the 1.76 Bi-AS GO lens by Tokai, a dual-surfaced, single-vision lens that's a game-changer. Its unique technology sharpens clarity and optimizes your view, while also offering the slimmest lens design available globally. Experience the ultimate in visual precision and ultra-thin comfort.

Thin and Light

With conventional lenses, face line tends to look unnatural as the picture shows. The specially designed front surface aspheric design for Bi-AS provides more natural appearance seen from other people with the lowered base curve at the edge of lens.
