

Precision Without Limits

Unity V3 Elite Progressive Lenses

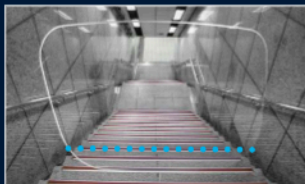

Unity® V3 Elite Progressive Lenses deliver true lens customization, allowing you to give your patients the best vision possible so they can do the things they love—*better*.

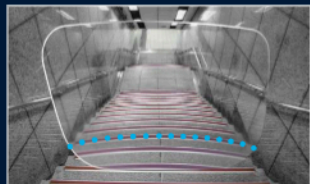

Powered by Intelligence

The Unity V3 AI algorithm is informed by more than eight million anonymized prescriptions and half a million de-identified data points and uses gaze dynamics data to optimize the near, intermediate, and far zones.

8M | **.5M**

With Unity V3 Elite

Without Unity V3 Elite

Engineered for Easy Dispensing

Artificial intelligence and sophisticated optical innovation help make dispensing easier than ever with no extra equipment needed.

Give patients vision so natural that they'll forget they're wearing glasses.
