Make work more comfortable

The Tokai Largo lens series is expertly crafted for near tasks, optimizing your vision for computer use, hobbies, and music playing in office settings or at home. These progressive lenses offer superior customization, ensuring a flawless visual experience tailored to your personal needs.

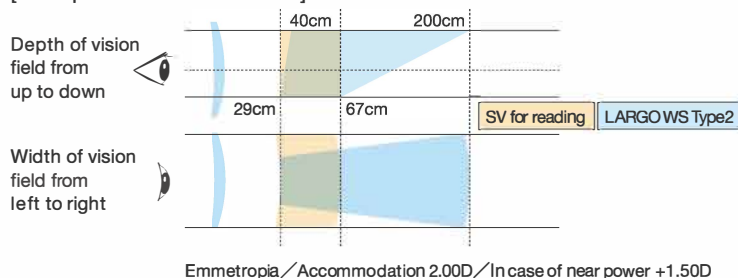

More comfortable than reading glasses

The LARGO series supports your office life by giving you a wider, easier field of vision than reading glasses.

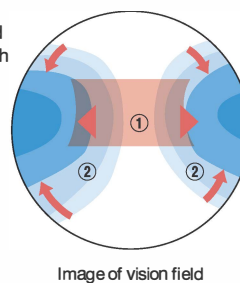

See further, wider, than reading glasses

[Comparison of vision field]

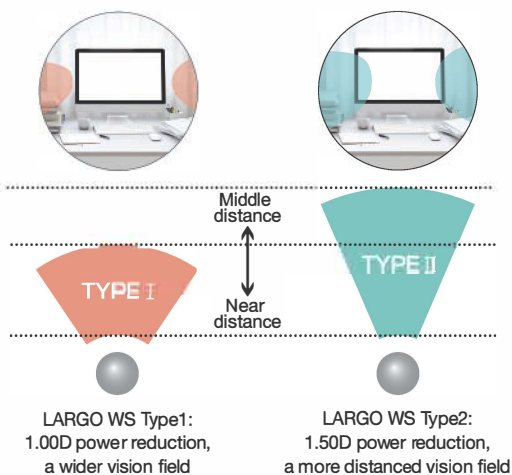

SQUARE design

- ① A wide vision is achieved by designing the lens with a square like progressive corridor.
- ② The distortion are minimized by dispersing the astigmatism.

Two types of designs

Select the type of power subtraction from 1.00D and 1.50D, depending on the age and / or the purpose of the use.

Natural eye movement

The lenses can be used comfortably because the eyepoint is set at 9mm below the fitting point following studies on the natural movement of the eyes.

The eye movement when seeing near
