

Where comfort and clarity converge

Sequel's patented lens technology is easy on the eyes, improving visual comfort and clarity without complicating your routine. Designed to conquer the visual demands of today's world, Sequel is the everyday lens that delivers unparalleled vision both on screen and off. Best of all, it's easy to dispense and even easier to wear.

A LENS FOR EVERYDAY LIFE

Extended screen time is no longer limited to a few. People of all ages, occupations, and walks of life have incorporated and embraced digital devices into all aspects of their daily lives.

58% of children have their own tablet by age 4¹

On average, employees are getting 97 hours of screen time a week²

Older Americans spend more than 50% of their leisure time on screens³

However, while our lives have transformed, lenses have not significantly evolved to help our eyes and bodies manage this new digital reality. We are ready to change that.

THE NEXT GREAT LEAP IN EVERYDAY LENSES

Sequel's exclusive patented **Convergence Boost technology** delivers unparalleled visual comfort and clarity both on screen and off. It's time to let the lenses do the work, and the difference is easy to see.

Standard Lenses

When doing prolonged near tasks, our eyes are required to be in an uncomfortable, converged state.

Sequel Lenses

Convergence Boost technology shifts images at near, allowing our eyes to be in their most natural, comfortable position.

A lens for everyone

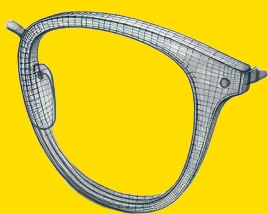

Finally, a lens that meets the modern-day visual needs of all your patients—single vision, anti-fatigue, and progressive wearers. Sequel has it all in just one portfolio.

EASY TO DISPENSE

Select the Sequel lens design that best fits the patient's age and accommodative support needs.
