How Does the Shamir Lens System Work?

The Shamir Lens System is designed to give practices access to Shamir lens designs at competitive pricing while pairing them with our premium AR treatments. This approach allows practices to offer a well known brand while maintaining strong margins in the dispensary.

This program combines Shamir designs with our in house AR technologies as part of a packaged system. By structuring the program this way, we are able to maximize pricing advantages while also encouraging the use of our ultra premium proprietary coatings and lens options.

Being a leader in independent eye care means supporting the freedom to choose the brands and designs that fit your practice best. The Shamir Lens System makes it easy to incorporate Shamir products into your dispensary while still working within a pricing structure designed for independent practices.

The Shamir Lens System works well for practices that want:

- Access to a recognized premium brand
- Competitive pricing packaged with premium AR treatments
- Flexibility alongside our proprietary lens offerings

This program allows practices to confidently offer Shamir lenses while benefiting from the service, flexibility, and independence that come from working with an independent laboratory.

This Lens System is eligible for multiple pair 50% discount.

Lens Add-Ons

Artisan Coatings
