How Does the Artisan Value System Work?

The Artisan Value System is designed to provide a simple, predictable way to order everyday lenses at highly competitive pricing. It is ideal for practices that want a dependable option for basic prescriptions while maintaining strong margins in the dispensary.

This program uses a simplified pricing structure. Each lens design has a single base price, and only a limited number of material and coating options are available. By keeping the options focused, we are able to streamline production and pass along lower costs.

When ordering through Digital Vision, SpecCheck, or VisionWeb, simply select the Value System package according to the How to Order guide on this page. Phone or fax orders are not eligible.

Value System pricing is intended for straightforward jobs. If a lens option or combination is selected that is not part of the program, the order will automatically revert to your standard pricing.

This program works best for:

- Everyday single vision and basic lens designs
- Competitive second pair packages
- Budget friendly offerings for patients

Material upgrades and coatings listed on this sheet may be added to the base lens price where applicable. Finishing services and shipping charges are applied as shown.

The Artisan Value System allows practices to offer dependable lenses at an aggressive price point while still working with an independent laboratory committed to supporting private practice optometry.

This Lens System is eligible for multiple pair 50% discount.

How to Order

DVI Rx Wizard: Select AVDV package under PACKAGES at the start of your order to limit availability of options to only those options included in the program. This will also ensure the pricing is properly in

SpecCheck Rx: Select AVDV service code under SERVICES after entering your lens order and before the open space for messages to the lab.

Vision Web: Under COATINGS select AVDV package. This will send a code to our lab that this order should qualify for this price program.
