

Neochromes[®] Light Activated Lenses

Ask your eyecare professional for more information about these highly advanced photochromic lenses activated by light.

Protection from harmful UV and blue light

Blocks **100%**
UVA & UVB light

Neochromes lenses help you care for your eyes by blocking 100% of damaging UVA and UVB rays.

Great **filtering** against
high energy **blue light**

They also filter blue light, especially when activated outdoors. While blue light is emitted from computers, tablets, and smartphones, sunlight is a much more intense source of blue light.

UNACTIVATED
Transparent State

ACTIVATED
Dark State

Absorption (400 nm - 420 nm)
